Customer pain point

- ▶ Difficulties managing internet connectivity for 3000+ internet users
- ▶ Overlapped networking gear and application installed by previous vendor
- ▶ Slow connectivity due to overlapped firewall rules and equipment installed from several different provider
- ▶ To find solution how to enable bandwidth segregation or aggregation
- ▶ Difficulties managing network due to regular IT staff resignation

Solutions

- ▶ Restructured and reconfigured routing and firewall for better connectivity
- ▶ Identify, upgrade all existing firewall / router and remove unwanted / over-lapped device installed by previous vendor
- ▶ Managed bandwidth / network optimization
- ▶ Backup / restore router setting
- ▶ Identify, relocated & reorganize server location
- ▶ Provide remote monitoring support services
