Semua Tingkat

Customer pain point

- ▶ Difficulties to managed 22 isolated modem/ISP account in single premises
- ▶ Difficulties to reset password and regular intermittent internet connectivity
- ▶ To many unmanaged Wi-Fi SSID and unmanaged Wi-Fi channel which create channel clash and Wi-Fi interference
- ▶ Difficulties to do web-teleconference due to unstable internet connection

Solutions

- ▶ Upgrade and exchange internet service protocol for better performance
- ▶ Optimize network, extend coverage and maintain Kompleks Seri Perdana WiFi under Bring-Your-Own-Device (BYOD) concept implementation at Level 1, Ground Floor, Staff Area (KITCHEN), Protokol & Banquet
- ▶ Firewall management by group bandwidth segregation and aggregation
- ▶ Provide remote monitoring and support services
